Ogeborg

**With Great Craftsmanship And  
Profound Knowledge We Make The World A Softer Place**

Ogeborg is a family-owned business in Sweden. For over five decades and for two generations we have shared our expertise and passion for honest high quality materials and textile floors. Everything we do, we do with a great attention to detail and with a deep understanding of the tactile values a carpet or rug requires to be long lasting and timeless.

We are always curious, curious to find new ways and techniques. We believe that we grow through collaboration and by having a curious mind you can find a solution to the impossible together. We believe in flexibility and with our technique of making hand tufted and hand woven carpets and rugs we can produce almost any size, shape and pattern.

A textile floor does not only make the world softer, it also helps to define an interior or the function of a room. It can set the tone for an entire space or play a small modest part by enhancing the feeling and mood.

No matter where you start your project, we will assist you in your choice and assure that the result will be long lasting, high quality and have a low impact on the environment.
